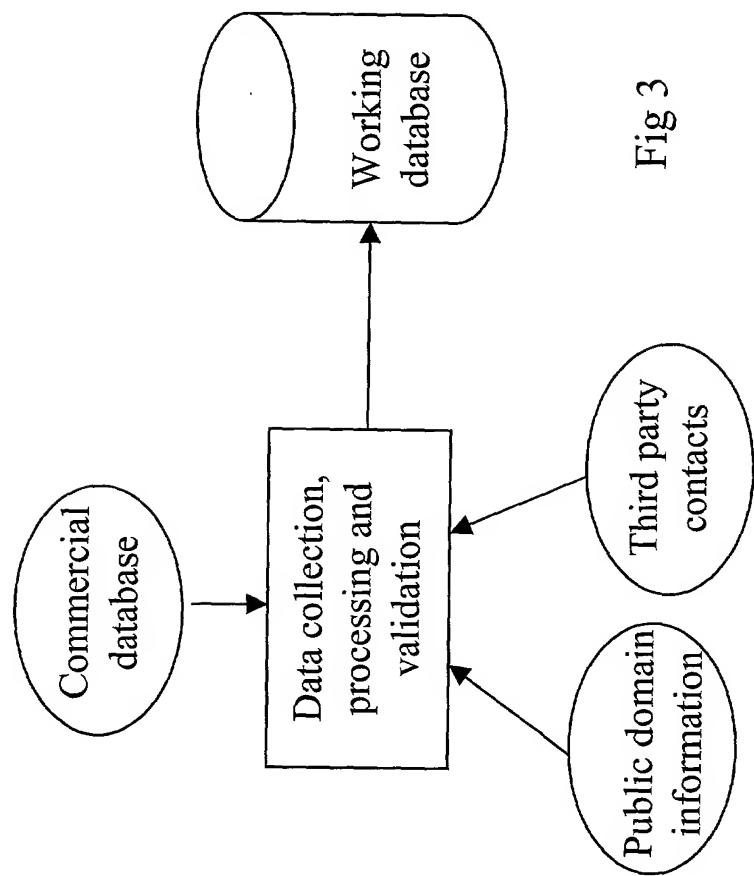

Fig 3

Feature Matching Based BM Selection	
<u>List of Features</u>	<u>Matching Criteria</u>
System peak load (MW)	Much high than median
Total retail sales (MWh)	Higher than median
Total retail customers	Around median
Network losses (%)	Lower than median
CapExp (k\$) per customer	Much lower than median
O&M cost (k\$) per line mile	Around upper 25 percentile
.....

Fig 4

<u>Based on</u>	<u>Neighborhood</u>
System peak load (MW)	within 20%
Total retail sales (MWh)	within 50%
Total retail customers	within 20%
Network losses (%)	within 15%
CapExp (k\$) per customer	within 20%
O&M cost (k\$) per line mile	within 20%
.....
